DETAILED ACTION

Claims 1-8 are pending in the instant application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Applicant is required to elect a single SEQ ID No. from claim 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions comprising the different nucleic acid molecules are biologically and functionally different and distinct from each other and thus one does not render the other obvious. The different compounds are not required for the methods steps of the other Groups. The operation, function and effects of the different oligonucleotides are completely different and distinct. Therefore, the inventions of these different, distinct groups are capable of supporting separate patents.

Pursuant to 35 U.S.C. 121 and 37 C.F.R. 1.141, the different oligonucleotides listed in claim 1, and encompassed by claims 1-8, are subject to restriction. In the instant case, **one (1)** independent and distinct nucleotide sequence will be examined in a single application without restriction. Those sequences which are patentably indistinct from the sequence or region selected by the applicant will also be examined.

Claims 1-8 specifically embrace different oligonucleotides with different SEQ ID Nos. Each of these oligonucleotides is considered to be structurally independent,

because each is represented by a unique nucleotide sequence. Furthermore, a search of all the sequences claimed presents an undue burden on the Patent and Trademark Office to search and examine. In view of the foregoing, applicants are required to elect up to ONE (1) SEQ ID No. or corresponding oligonucleotide.

Therefore, the inventions of these different, distinct groups are capable of supporting separate patents.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
